

**Saturday 4th and Sunday 5th September 2021 Calvisano (BS)**

will be the setting for a beautiful Historical Reenactment, in the splendid setting of Castello Lechi. Let's Change the Future by Living the Past" represents an absolute novelty, introduced by the Pro Loco of Calvisano, in synergy with the Municipality of Calvisano and the Counts Lechi, owners of the Castle, where the re-enactment will take place. The Castle will allow visitors the opportunity to experience a journey back in time, in the presence of ladies, knights, soldiers, jesters two days of history, but also of lightheartedness and joy, which in this very difficult period have been so missed, due to the pandemic that has overwhelmed humanity.

Here is the name of the event to be read and framed precisely in this context of rebirth, with an eye on history and the past. Ammoni other things, the choice of the historical period, in which the re-enactment of Calvisano was set, was not absolutely accidental.

In 1630 the terrible plague broke out in Calvisano too, which Alessandro Manzoni described in an incomparable way in his Promessi Sposi. In that year a member of the Pollini family (as Count Teodoro Lechi recalls in one of his manuscripts) vowed to distribute an aromatic vinegar to the population of the village, so that his family would be spared from the plague. Only known antiseptic of some validity. That terrible calamity, as it began, miraculously ended suddenly after a great rain fall and .... 500 victims. The Coronavirus and the plague two different but equal calamities, from different eras but with a single common denominator. Then the vinegar, today the vaccination with the GREEN PASS.
